

EU RoHS3 & China RoHS Seal Connect Declaration

12 August 2026

Dear: **Greene Tweed Customer**

Greene Tweed is fully committed to supporting RoHS compliance at all levels of our corporation. As a global leader in specialty seals and sealing components, we comply with all relevant regulatory requirements for our products, including China RoHS and EU RoHS 3 (Directive 2011/65/EU as amended by Directive (EU) 2015/863).

We reviewed the ingredients of our **Seal Connect products** against the RoHS 3 and China RoHS restricted substance list. We confirm that Greene Tweed Seal Connect products comply with Directive 2011/65/EU as amended by (EU) 2015/863, utilizing **RoHS Exemption 6(c)**, which permits lead as an alloying element in copper and brass alloys up to 4% lead by weight.

Greene Tweed considers the parts supplied to your company to be "articles" under the definition of these regulations. These products only contain substances that are not intended for release during normal, designed, and intended use.

Please note the following regarding our compliance verification:

- **Supplier Data:** We do not independently test materials for China RoHS or RoHS 3 substances. Instead, we make this determination based on our knowledge of these products and Safety Data Sheets (SDS) provided by our suppliers.
- **Good Faith:** This information is supplied in good faith and is accurate as of the date of this letter.
- **Continuous Monitoring:** Greene Tweed monitors changes to these regulations and will take necessary actions to evaluate or eliminate newly restricted substances.

Regards,

Greene Tweed Material Compliance
